

Velpont® Bridges: Engineered with Purpose. Aligned with Nature.

PRECAST MODULAR BRIDGE SYSTEM

Velpont is a fast, cost-effective, reliable, and environmentally friendly modular bridging solution for small-stream crossings. Explore a smart, sustainable alternative to pipes, culverts, and cast-in-place bridges.

THE BEST BRIDGE
ALTERNATIVE

WATCH VELPONT'S STORY

It's been easy to work with, has a nice architectural appearance to it, and it goes together quite seamlessly.

BOG BROOK

Length: 40 ft (12.2 m) Span (33 ft [10 m] Clear Span)

Width: 24 ft (7.3 m)

Partners: U.S. Fish & Wildlife Service, Maine Inland Fisheries & Wildlife

The Bog Brook project replaced a deteriorating culvert to restore natural water flow and strengthen the site's overall infrastructure resilience.

GARLAND ROAD

Length: 17.5 ft (5.3 m) Span (14.5 ft [4.4 m] Clear Span)

Width: 36 ft (10.9 m)

The Garland Road project removed undersized culverts to strengthen road infrastructure and increase freedom of passage for fish and other aquatic organisms.
